ASOLA 2 (HARDE KNOPPEN) VERVANGEN DOOR PHOENIX

Motherboard basic firmware must be updated with the PELE1712 firmware version or higher in order to install the new PHOENIX remote control.

Step-by-step procedure as follows:

1- **Switch the stove off through the on/off power key placed on the back.**
2- **Insert batteries into the PHOENIX remote control.**
3- **Insert the USB key containing the PELE1712 firmware into the USB slot fitted on the back of the stove.**
4- **Give power to the stove through the on/off power key.**

Correct update will be confirmed by a "beep" after 30 seconds approx.

PHOENIX remote control must now be paired and synchronized with the stove. Following screen will appear:

5 – Press the **key on the remote control within 30 secs from the "beep".**

Following screen will appear:

PHOENIX remote control will synchronize with the stove.

ASOLA 1 (SOFT TOETSEN) VERVANGEN DOOR PHOENIX
